METAMAX

WHITEPAPER

PROJECT INTRODUCTION

MetaMAX (Mmax) is a deflationary reflection token on the Binance Smart Chain. It aims to be the fast-growing currency of its kind, automatically rewarding holders in BUSD, a regulated stablecoin, pegged 1:1 with US dollar.

VISION

MetaMAX Ecosystem combines all the essential elements that make up an ultimate coin. The community oriented BEP20 token is based on fast and easy exchanges of value and utilizes automatic liquidity pools in addition to coin burning strategies. Along with the static reward system mechanism, MetaMAX is here to stay for the very long run.

MISSION

The goal is to present a decentralized platform that bridges the gap between crypto and fiat currencies and brings the benefit of the crypto world to the wide public, offering its unique features in the Crypto and NFT markets. Based on the Binance Smart Chain, it has up to 10X quicker block speed and much lower fees comparing to most projects competing in this space.

MetaMAX coin is proud to be one of the world's first yield generation token to reward its holders in \$BUSD. It is establishing a new standard in Defi Tokenomics, with innovating and game changing token distribution strategy. Due to the stablecoin dividends being paid for all transactions, investors benefit from both bull and bear markets.

Abstract

MetaMAX is a front runner among all cryptocurrencies. With its anti-whale system, the coin discourages massive drops by limiting any sell amount of the circulation supply. In addition, in every transaction, a small percentage of tokens is automatically transferred to the exchange liquidity pool.

MetaMAX also maintains a buyback reserve in which tokens that are converted into Binance coin (\$BNB), are securely locked and stored within the Mmax contract. These BNB are then used for strategic buyback and burn – The contract buys Mmax coins and by that, creating volume, rewards and positive price action. Then, it sends those tokens to the burn address, removing them permanently from circulation, including rewards eligibility. This step creates a situation in which holders of the coin continuously receive a higher overall share of rewards distributed and the circulating supply reduces over time.

SMART CONTRACT

The MetaMAX smart contract algorithm was developed with advanced functions as described in the following page:

Transaction Fees

Every time any user makes a transaction with the MetaMAX token, he will be charged an **8%** fee that will be allocated automatically as follows:

Reward for Holders

4%

Liquidity Pool

1%

Marketing

1%

Development

1%

Public burn

1%

PERCENTAGE OF DISTRIBUTION

The issuer undertakes not to issue more than 10,000,000,000 MetaMAX Tokens, with a distribution priority (which may change in the future) as follows:

ROADMAP

Phase 1

- PROJECT APPROACH
- WHITEPAPER
- PROMOTION
- WEBSITE DEVELOPMENT
- TOKEN CREATION
- AIRDROPS

Phase 2

- AGGRESSIVE MARKETING CAMPAIGN
- PRIVATE SALE
- PUBLIC SALE PINKSALE
- LIST ON CMC & CG

Phase 3

- LIST ON OUR FIRST EXCHANGE
- STAKING APP WITH A GREAT REWARD FOR HOLDERS
- MASS MARKETING AFTER EVERY SINGLE STEP TAKEN
- TOKEN AUDIT
- PARTNERSHIP WITH BLOCKCHAIN
- LAUNCH OF OUR APP DEFI 2.0

Phase 4

- CREATION OF MULTI-CURRENCY WALLETS
- NEW TOKENS WITH UTILITY IN OUR ECOSYSTEM
- LAUNCH OF OUR FIRST NFT VIDEO GAME TRIVIAL TYPE

Thank You!
